

## Implementation of Epicor 10 ERP at Bond Interiors

Implementation of Epicor 10 ERP at Bond Interiors, a multinational company based out of Dubai

### ABOUT

- **Name:** Bond Interiors, Dubai
- **Headquarters:** Al Qusais Industrial Area 4, Dubai, UAE
- **Industry :** Head quartered in the UAE with offices across the Middle East and Asia, Bond Interiors is a multinational company specialized in the interior contracting industry since 1986. With projects across the world in the sectors of Hospitality, Healthcare, Banking, Corporate, Food & Beverage and Retail.

### BUSINESS CHALLENGE

- Difficulties in managing labour requirements across project locations
- Visibility of Inventory stocking and details across projects
- Deriving Actual Project Cost vs Estimated
- Unplanned Project cost over-runs
- Raw materials planning and handling
- Integrated view for Finance
- Limitation in Integrating Multiple Third Party Applications.

### RHEINBRÜCKE SOLUTION

Implemented Epicor10 with Projects, Production, Quality Assurance, Financial, Inventory, Purchasing, Sales and Payroll Modules

- Structured implementation compliant with statutory requirements
- All Third Party Managed Operations - integrated view of Estimation, procurement and project execution through ERP
- Material Request validation with specification and cost
- Integrated Time and Attendance for Payroll and Project Costing
- Automation of Material codification with 8 different attributes
- Budget definition based on estimates and variance analysis
- Consolidate planning for all the departments from Design (Engineering) to execution.

### BUSINESS IMPACT

- Better collaboration between departments using EPICOR Social Enterprise
- Control on the Project Management, support to make decisions on project variance, both internal and external
- Workflow to track project activities such as RFI and Material approvals
- Streamlined inventory management and production processes
- Centralized repository for Data. Real time access to ERP Data for analysis
- Elimination of manual reporting process and faster month end closing activities / other cross functional processes
- Account reporting using AFR
- Improved Data Security and restricted access to sensitive data
- Interactive Business Dash Boards & graphical reports.
